

CONTOURS

ARCHITECTURAL TIMBER LININGS

Combine the beauty of timber with our contoured lining boards and mood lighting to create warmth and interest to any space.

Our ability to mould and finish the profiles to your specification makes the Contours Architectural Lining Board range a beautiful addition to walls, ceilings & island benches.

Extend the look to your outdoor spaces such as your alfresco area and tie into our external cladding range for a smooth transition from indoor to outdoor living areas.

Each job is finished to your specification and our short turn around times enable projects to be delivered quickly ready for immediate installation.

Select your profile, timber species*¹ & grade (Clear or Character*²) as well as your preferred final finish & gloss level.

Choose from our standard stain selection or specify a custom finish to match your existing colour palette.

Speciality finishes include:

- Clear Fireshield® Group 1 fire rating
- Clear Anti-Bacterial coatings.
- Whitewashes
- Solid paint finishes
- Darkened shadow lines
- UV resistant clear finishes

At ITT we offer the complete service – moulding, coating and on time delivery at a competitive price.

Please refer to the ITT profile selection chart for the profile range available. Profiles can be supplied in any timber type subject to availability of timber.

Ask about our External cladding and decking range and coating services

Coating Services:

We provide specialist finishing services as well as mouldings.

Whether you need a standard clear coat, a stained finish or a custom colour, we can meet the needs of most projects. Reduce hassle, time and cost by ordering the coating with the timber.

Installation time on site is reduced, quality is improved and the boards can be sealed all round reducing potential for movement and shrinkage. Our coatings range includes FR coating and Anti Bacterial coating as well as a variety of staining and coating finishes

Fire Retardant Coatings (Fireshield)

Fireshield® is a intumescent coating designed to expand and char when exposed to the heat of a fire, preventing further spread of flame.

We are Australia's premier certified applicator of Fireshield® coatings on lining boards, battens and other boards.

Our clear Fireshield® coating preserves the inherent beauty of the timber whilst providing Group 1 protection.

We can also apply Fireshield under standard paint finishes if required.
