

# CONTOURS

## ARCHITECTURAL TIMBER LININGS

### PROFILE SELECTION SHEET

# 2020/21 Release

PROFILE ITTINT-**F78** ( Dune ) mimics the curve of custom orb

PROFILE ITTINT-**G78** (Ripple) mimics the tight curves of mini orb

PROFILE ITTINT-**H78** (Summit) Art Deco with sharp peaks

PROFILE ITTINT-**M78** (Strata 43) for a wider batten look we now offer a 43mm batten with 35mm shadow line

PROFILE ITTINT-**N78** (Furrow) with a more concave shape and narrower beads, Furrow is a variation on Riverine for something a little different

PROFILE ITTINT-**O78** (Mesa) narrow beading with similar shadow lines

## Old Favorites

PROFILE ITTINT-**A78** (Riverine)

Profile mimics the half round batten look.

PROFILE ITTINT- **B78** (Cirque)

The concave grooves create regular shadows in good lighting

PROFILE ITTINT-**C78**

Showcase the timber grain and create wide shadow lines

PROFILE ITTINT-**D78**

Mimics battened walls -widths can be varied on request

### PROFILE ITTINT- E78/E39

2 widths 39/ 78mm - combine with other profiles create new patterns

### PROFILE ITTINT- I78

Effective patterns when alternating profile direction

### PROFILE ITTINT- K78

The wide channel highlights the beauty in timbers like American Oak

### PROFILE ITTINT- K78R05

Similar to the K profile but adding a 5mm shadow line for effect

### PROFILE ITTINT- J78

Alternating batten widths it can be mixed for a random effect

### PROFILE ITTINT- S78 (Shiplap)

Lay in a traditional pattern or mix with others for randomised effect

## CORNER BEADS

Riverine

Cirque

Strata

Dune

Summit

Ripple

ITT beading is designed to compliment the lining board range and allow some profiles to negotiate corners with a radius down to 400mm. For details on how to wrap the lining boards around corners please refer to the ITT installation guide

The profiles on this guide can be produced in most timber species – subject to availability.
